

MASKING TAPE

Blue Outdoor

High quality OUTDOOR masking tape from TM Mustang is a professional tape designed for facade work. The base of the tape is crepe paper with an adhesive layer of synthetic rubber on one side. The specificity of the adhesive layer determines the high adhesive properties of the tape in combination with easy removal of it from any surface. Masking tape has high elasticity and strong adhesion to smooth, rough, embossed and difficult surfaces. These properties make it possible to obtain clear lines when painting and varnishing, to exclude paint dripping on vertical surfaces.

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity (pcs/box)	Color	Packaging	Thickness	Barcode
Special crepe paper	Acrylic solvent	MTB4825	48mm*25m	72 pcs.	Blue	Color label on the roller, individual packaging into shrink film	140 μm	4824012356971
		MTB4850	48mm*50m	36 pcs.				4824012356988

ADVANTAGES:

- compatibility with most types of paints;
- high quality crepe paper absorbs paint and prevents it from getting on the surface to be protected;
- possibility of using in conditions of high humidity;
- high elasticity;
- excellent adhesion to various types of surfaces;
- resistance to solvents;
- absence of traces of glue after removal at temperatures up to + 80°C and short-term exposure to UV radiation;
- tensile strength combined with adhesive strength.

APPLICATION:

- protection of facades when painting and decorating walls outside the premises;
- varnishing of wood;
- protection of surfaces made of brick, concrete, vinyl, plaster, glass, aluminum, plastic during paintwork;
- determination of the boundaries of color;
- sealing of minor gaps;
- creation of a protective cloth when carrying out repair and finishing work outside the premises;
- fastening a coating that protects the surface from paint and other types of contamination.
