

DUCT TAPE

CONSTRUCTION & ENGINEERING

CONSTRUCTION & ENGINEERING duct tape from **TM Mustang** has a high-quality adhesion to any surface. The tape is made of special polyethylene and reinforced with special fabric fibers. The tape is designed for strong adhesion of parts and surfaces from any materials, both outside and inside. Construction & engineering orange duct tape is ideal for super strong bonding of porous, rough and uncleaned surfaces. The tape has high tensile strength and low elongation.

CHARACTERISRICS:

Base material	Adhesive layer	Vendor code	Size	Quantity pcs/box	Color	Heat resistance	Barcode
PE film + reinforced fabric mesh	Synthetic rubber	DTC5010П	50mm*10m	48 pcs.	Orange	from -30 to +70°C	4824012356445

ADVANTAGES:

- excellent strength of permanent adhesion;
- high level of density and elasticity of the tape, due to which it duplicates all the relief features of the materials being glued;
- reinforced base prevents tape stretching and longitudinal breaks;
- high resistance to abrasion, weathering, UV stability;
- resistance to water, oils and grease;
- anti-corrosion properties;
- preservation of quality parameters for a long time.

APPLICATION:

- repair of various surfaces: car seats, rubber hoses, building fences, covering films;
- sealing of ventilation pipes;
- connection of packing elements carrying increased loads;
- fixing the joints of the vapor barrier on brick and concrete surfaces;
- repair of wooden handles of tools (hammer, ax);
- repair of garden equipment (glanders, shovel, pitchfork);
- marking of wires, cables, etc.;
- fixation of joints of heat-insulating and insulating roll film materials to any type of surfaces;
- repair of plastic and wooden furniture.
