

DUCT TAPE

WATERPROOF

Waterproof duct tape from TM Mustang is characterized by increased resistance to moisture, UV radiation and longitudinal tear strength. The tape is made of special polyethylene and reinforced with fabric fibers. The waterproof duct tape is specially designed for use in humid indoor environments, as well as for outdoor work with high humidity. The high-quality adhesive composition guarantees stable adhesion when joining surfaces of various materials.

CHARACTERISTICS:

Base material	Vendor code	Size	Quantity pcs/box	Color	Heat resistance	Barcode
PE film + reinforced fabric mesh	DTC5010C	50mm*10m	48 pcs.	Blue	from -40 to +70°C	4824012356452

ADVANTAGES:

- water resistance, UV stability and increased resistance to atmospheric agents, oils, grease;
- high level of adhesion to most materials;
- tensile strength and low elongation coefficient;
- anti-corrosion properties;
- simplicity and ease of use;
- preservation of quality parameters for a long time.

APPLICATION:

- sealing of pipe joints, cracks and seams;
- carrying out insulation and plumbing works on surfaces that come into contact with moisture;
- sealing of ventilation pipes;
- repair of industrial facilities in conditions of high humidity or in water;
- temporary isolation of leaks;
- fixing the joints of the vapor barrier on brick and concrete surfaces;
- sealing of objects exposed to moisture;
- bonding surfaces with low adhesion, such as carpets;
- protection of cables and wires from aggressive environmental influences;
- packing heavy loads in an automatic or manual way;
- control pasting;
- fixation of joints of insulation and insulation roll film materials to any type of surface;
- connection of pipes and fittings.
