

HOUSEHOLD DUCT TAPE

UNIVERSAL

ADVANTAGES:

- ultra-high adhesive capacity;
- ultra-high longitudinal tensile strength;
- various areas of application (household, repair, construction);
- it can be used on dirty and dusty surfaces;
- high level of adhesion to all types of surfaces: metal, plastic, glass, wood, film, ceramics, concrete, stone;
- the convenience of use.

APPLICATION:

Due to the unique structure of the adhesive layer, resistant to dust, UV-radiation, temperature decelerations, moisture and many other factors, the reinforced tape is used in many areas of repair and construction: for temporary insulation in plumbing works; repair of furniture, household items, garden and construction equipment; for sealing seams and joints; for insulating works; when installing and repairing ventilation, heating and other climatic equipment; in the automotive industry.

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity in a box	Color	Packaging	Thickness	Heat resistance	Barcode
polyethylene film + reinforced fabric mesh	synthetic rubber	PDTS4810	48mm*10m	12 pcs.	Grey	Colored label on roll, individually shrink-wrapped	240µm	From -15 to +60°C	4824025519547
