

LED MOUNTING

DOUBLE-SIDED
ADHESIVE TAPE

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity in a box	Color	Packaging	Thickness	Heat resistance	Barcode
PET film	modified acrylic	LD1010	10mm*10m	30 pcs.	Transparent	Blister packaging	0,23mm	from - 40°C to +100°C	4824025532775

APPLICATION:

Double-sided transparent adhesive tape **LED MOUNTING from TM MUSTANG** is a high-quality technological tape that provides quick fixation of objects to surfaces, forming an inconspicuous contour and level of attachment. Due to its elasticity, the tape is ideal for fastening objects and elements with an unstable structure. Designed for outdoor and indoor use. The tape is resistant to low and high temperatures, adverse weather conditions, moisture, dust, and UV-radiation.

THE TAPE IS IDEAL FOR GLUING AND MOUNTING OF:

- LED strips;
- linear lamps;
- LED modules;
- controllers;
- LED profiles;
- sensors;
- conversion kits;
- LED strips;
- LED garlands.

ADVANTAGES:

- resistance to temperature changes, UV-radiation and moisture;
- high peel and shear strength;
- fastening durability;
- high level of initial and final adhesion;
- provides an invisible gluing contour;
- provides an even and consistent structure of materials that stick together.
