

MASKING TAPE

decor

Yellow indoor **DECOR** masking tape from **TM Mustang** is a single-sided adhesive tape made of textured corrugated paper with an adhesive layer of synthetic rubber. Yellow masking tape is one of the consumables that is used in all types of painting and varnishing works. The paper base of the tape is impregnated with a latex compound to enhance water resistance during application. The thickness of the base allows the tape to be removed without tearing, and its density does not allow the masking tape to delaminate and does not allow the edges to rise when paint gets in. The special composition of the rubber adhesive ensures easy removal of the tape after use without glue residues. This type of tape is used for repair and interior decoration work.

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity pcs/box	Color	Heat resistance	Barcode
Crepe paper	Synthetic rubber	MY3820	38mm*20m	84 pcs.	Yellow	to +70°C	4824012005701
		MY4820	48mm*20m	72 pcs.			4824012005718
		MY4830	48mm*30m	72 pcs.			4824012005725
		MY4850	48mm*50m	36 pcs.			4824025532942

APPLICATION:

- marking of boundaries when painting with most types of paints;
- temporary fixation, fastening, packaging, sealing and simple masking, where a tape with permanent adhesive is required;
- protection of various elements from the ingress of unwanted substances;
- connection of elements for a short period of time;
- protection of glossy and smooth metal surfaces from damage during storage or transportation;
- product labeling;
- fast marking of drilling points;
- protection of any surfaces (individual sections of walls, tiles, glass, mirrors) when painting, creating multi-color compositions, applying plaster;
- protecting the door leaf from foam during installation;
- protection of glass, plastic and metal surfaces from scratches and chips;
- limitation of areas of painting in production and repair work.

ADVANTAGES:

- absence of traces of glue on surfaces after removal;
- density and elasticity of the tape base, combined with a high level of strength (resistance to edge tears);
- excellent adhesion to various types of surfaces and instant fixation;
- compatibility with most types of paints and varnishes;
- resistance to mechanical impact with abrasive materials;
- ease of tearing, applying and removing the tape;
- flexibility and excellent adhesion to the surface;
- preservation of quality parameters for a long time.
