MOUNTING

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity in a box	Color	Packaging	Thickness	Heat resistance	Barcode
Foamed polyethylene	Solvent	PM192	19mm*2m	30 pcs.	The base is white, liner is blue	Blister packaging	1mm	-20 ... +120°C	4824025532522

APPLICATION:

The foamed base of the tape eliminates and compensates for all uneven surfaces, therefore firmly and reliably glues even, uneven and rough surfaces. The tape amalgamates materials from metals, wood, glass, rubber, plexiglass, ceramics, plastic. It is ideal for gluing parts and elements with imperfect geometric shapes; fixing lenses and touch panels in electronic devices; installation of mirrors, paintings, panels, interior and exterior decor elements; installation of cable channels and panels.

ADVANTAGES:

- perfect adhesion to all types and shapes of surfaces;
- resistant to UV-radiation, moisture, solvents, adverse conditions;
- a substitute for screws, nails and glue;
- suitable for indoor and outdoor use;
- provides an even and consistent structure of materials that are glued.
