

PROF WATER STOP

SELF-VULCANIZING TAPE

FOR EXTREME CONDITIONS

REPAIR ▼ PIPES ▼ HOSES ▼ NOZZLES ▼ FITTINGS

- ▼ hermetic waterproof seal in seconds
- ▼ can be used even under water
- ▼ withstands temperatures from -60 to + 260 °C
- ▼ withstands pressure of 12 bar

Self-vulcanizing silicone tape PROF WATER STOP from TM MUSTANG is a transparent tape on a glueless basis. The tape is UV stable, resistant to corrosion, chemicals, moisture, so it reliably seals even oily, damp and dirty surfaces. The tape adheres extremely strongly to the surface and can only be removed mechanically. Full vulcanization is done 24 hours after application.

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity in a box	Color	Thickness	Heat resistance	Barcode
silicone	absent	SVT253	25mm*3m	16pcs.	transparent	500 microns	from -60 to + 260 °C	4824025533420

APPLICATION:

- instant liquidation of leaks without obligatory blocking of water access;
- sealing and long-term repair of water pipes, hoses, nozzles and fittings;
- corrosion protection;
- restoration of damaged high pressure hoses;
- emergency repair, where the speed of solving the problem is of great importance;
- sealing of pipe bends, tie-ins, plugs and other elements.

ADVANTAGES:

- hermetic waterproof seal in seconds;
- the ability to use under water and on wet surfaces;
- withstands temperatures from -60 to + 260 °C;
- withstands pressure of 12 bar;
- does not contain glue, therefore does not leave marks on the surface after removal;
- ideal for permanent sealed waterproofing;
- ease of use and high reliability of the tape.
