

SUPERFIX

DOUBLE-SIDED ADHESIVE TAPE

CHARACTERISTICS:

Base material	Adhesive layer	Vendor code	Size	Quantity in a box	Colour	Packaging	Thickness	Heat resistance	Barcode
Foamed polyethylene	Synthetic rubber	SF255	25mm*5m	60 pcs.	base – white, liner – red	Colored label on roll, individually shrink-wrapped	1mm	from -30 to +120°C	4824025532638

APPLICATION:

Double-sided adhesive tape SUPER FIX from TM MUSTANG is a heavy-duty tape designed for mounting and fixing heavy objects. Due to the thickness of 1 mm and the foam base, the tape compensates for all unevenness of the surface on which the installation is carried out, evenly distributes the load over the entire plane of the base and forms a strong connection. Due to the width of 25 mm, the tape has a large area of adhesion of objects to surfaces, provides reliable and durable fixation. The synthetic rubber based adhesive ensures an even level of initial and final adhesion. Designed for outdoor and indoor use.

The tape is ideal for gluing and mounting:

- mirrors;
- household structures;
- decorative elements and signage;
- furniture;
- advertising media;
- interior items.

ADVANTAGES:

- the width of the tape provides a large area of adhesion;
- resistance to heavy loads;
- resistance to mechanical shear, UV-radiation and moisture;
- high peel and shear strength;
- fastening durability;
- uniform initial and final adhesion;
- provides an even and complete structure of the materials to be glued.
